Education

Global Institute of Technology and Management

Bachelor in Technology in Computer Science and Engineering (CGPA: 8.02)

2021 - 2025

Gurugram, Haryana

Experience

Probey Services Pvt.Ltd

April 2026 – Present

MERN Developer

Noida, Uttar Pradesh

- Built full stack dynamic web applications using the MERN stack — designing MongoDB schemas, developing RESTful APIs with Express.js, and delivering responsive React.js frontends end-to-end.
- Developed reusable, component-driven React.js frontends with Redux / Context API for state management, ensuring consistent UI and smooth single-page application experience.
- Implemented secure user authentication using JWT tokens, bcrypt password hashing, and protected routes — covering login, signup, OTP handling, and role-based access on both client and server.
- Followed modular MVC architecture in Express.js and collaborated via Git feature branching — maintaining clean, scalable codebases and contributing to team code reviews

B-Track India Pvt.Ltd

Oct 2025 – Jan 2026

Cloud Computing Intern

Gurugram, Haryana

- Assisted in deploying and managing cloud-hosted web applications, gaining hands-on exposure to CI/CD pipelines, server configurations, and environment-based deployment workflows.
- Applied best practices for cloud security, cost optimization, and performance monitoring — contributing to internal infrastructure tasks in a real team environment.

Skill Ladders

Aug 2025 – Oct 2025

Frontend Developer Intern

Gurugram, Haryana

- Developed dynamic, responsive frontend pages using React.js and Tailwind CSS — building reusable UI components that improved platform performance and user engagement.
- Improved code quality by refactoring components into reusable modules with clean state management using React hooks, and integrated third-party APIs with proper error and loading state handling.

Unified Mentor Pvt.Ltd

May 2024 – Jun 2024

Web Developer Intern

Gurugram, Haryana

- Built and enhanced client-facing web projects using HTML, CSS, JavaScript, and React — focusing on responsive UI, cross-browser compatibility, and real-world development practices.

Projects

Aurevia Healthcare – Healthcare Website | React.js, Tailwind CSS, Email Js, React Router DOM |

- Designed and developed a professional, healthcare-focused website with a clean and elegant UI.
- Implemented service sections for medical consultations, diagnostics, and treatment offerings.
- Ensured fully responsive design across desktop, tablet, and mobile devices.

QuotEase | React.js, Tailwind CSS, React Router DOM, SQL, Nodemailer / Node.js |

- Built a dynamic quotation generation web application where users can create, customize, and send professional quotations — similar to Refrens — with a clean form-based UI and real-time preview.
- Implemented quotation sending functionality via email integration, with features like itemized billing, client details, and a fully responsive layout optimized for desktop and mobile use.

User Authentication | React.js, Express.js, MongoDB, Node.js, Tailwind CSS, NodeMailer, React Router DOM |

- Built a scalable full stack authentication system using MERN stack with signup/login, email verification via Nodemailer, OTP handling, and protected routes.
- Followed best practices for API design, validation, and error handling with React Toastify for enhanced user feedback and reusable Tailwind CSS components.

ProSync – Project Management Tool | React.js, Tailwind CSS, React Router DOM |

- Developed ProSync, a full stack project management platform inspired by JIRA and Time Doctor — featuring task management, sprint planning, backlogs, time monitoring, and team collaboration tools built on the MERN stack.
- Implemented advanced features including gamification, kudos system, real-time project monitoring, and role-based dashboards — delivering an end-to-end productivity tool for agile development teams.

Technical Skills

Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript, Python

Technologies: React.js, Redux Toolkit, Tailwind CSS, Express.js, Node.js, MongoDB, SQL, Mongoose, REST API, Socket.io, Figma, Vercel, Git

Concepts: MVC Architecture, JWT Auth, RBAC, State Management, Responsive Design, RESTful API Design, Async/Await, DSA, Agile/Scrum
